

BAADER 605 / 607

with squeezing belt support

- Substantially higher belt lifetime
- Reduced load in the machine
- Lowest product losses
- Lower temperature increase in the end product
- Less loose parts
- Improved product in-feed

BAADER 605 / 607

With squeezing belt support

The BAADER 605 and BAADER 607 now with squeezing belt support system.
The unique design supports the squeezing belt actively during the whole pressing process.
This helps avoiding excessive load on product and machine during the entire process.

Your Benefits:

- Substantially higher belt lifetime
 - extended lifetime of belts
 - reduced cost of ownership
- Reduced load in the machine system
 - less load on the machine
 - gentler product handling
 - extended machine lifetime
- Lowest product losses
 - higher yield
 - improved hygiene at the work place
 - less cleaning effort
- Lower temperature increase in the end product
 - improved product quality
 - longer product shelf life
- Less loose parts
 - less cleaning effort
 - less spare parts consumption
- Improved product in-feed
 - reliable machine function
 - more gentle product handling
